

How-to add new languages

If a language is not available in the release try to see in the download Translations section of the site.

To install the language file Place it in the PlugIns folder inside the application.

Linux:

User_folder/voixmanager/PlugIns

Windows:

programs_folder/Voix Manager/PlugIns

MacOSX:

make "ctrl click" on the application and select "show content" then place the translation in the PlugIns folder inside the Voix Manager application package.
